

Echotec

ENGINEERED FOR
ENHANCED PERFORMANCE

PRODUCT
INFORMATION
2024

Designed, engineered and manufactured in Northern Ireland, the range of Echotec Tree felling equipment has all the highest quality materials and components. Sourced and integrated into each attachment resulting in enhanced performance, unbeatable quality and durability meaning it's the most versatile shear on the market. It has limitless uses for a variety of jobs. The range caters for 5-30T Machines.

All shears in the range come with a modular build. Add features such as rotation saw functions and grow with your work .All shears in the range come with a modular build so customisation is always possible.

The 350 Super Shear is the largest and our most powerful shear. Based on the 350mm shear with the option to add on a saw which cuts up to 650mm.

Double sided
(more efficient working - cut from both sides)

Removable Hardox 500 Blade
(Use as a grab)

Saw Option*
*Available on 350 Model

Rotation & Multi Hitch Option

Wide Opening

Full SSAB Build
Hardox & Strenx

12 Month Warranty
as Standard

CE Certified

**ENGINEERED FOR
ENHANCED PERFORMANCE**

250 SERIES

Currently the smallest of the range but suited for 5-10T machines. The Shear is full of power and efficient in work and it won't let you down.

The most popular Shear in the series and no wonder! Its strong and durable build features make it robust, powerful and a must have attachment. With the customization the shear can be used for limbing, facing, hedge row maintenance, tree removal, site clearance, loading, gathering, stacking and more. Never lets you down.

300 SERIES

The largest and most powerful Shear. A true Beast! The 350 Shear is ideal for those larger jobs but still controls the smaller jobs. With the series you retain the option to add on a Saw cassette and transform your shear into a saw Grapple and handle trees up to 750mm. This attachment has it all.

SAW GRAPPLE

A dedicated range for handling trees from 150-750mm. The Grapple saw is also the ideal grab for gathering and stacking. The Grab can be customised to suit the users needs with various options available.

350 SERIES

PRODUCT SPECIFICATIONS
